– **GARDEN 2-3 – Session 5: Benchmarking in the ADO community (Hybrid format)**

While there are strict rules in the World Anti-Doping Code (Code) and International Standards regarding the implementation of programs, it is sometimes unclear to Anti-Doping Organizations (ADOs) where their performance ‘should’ be or what is ‘sufficient’, e.g., in terms of resources and number of tests. With the use of data analytics, WADA has started to analyze ranges within which ADOs are performing in accordance with their obligations, enabling the creation of benchmarking tools. This can allow ADOs to assess themselves relative to others, and to have a realistic view of what they should be striving to achieve with program delivery. This session will discuss the process of coming up with these benchmarks, their utility, and their pitfalls.

– **GARDEN 2-3 – Session 6: NADO operational independence – lessons learnt and looking ahead to the 2027 Code (Hybrid format)**

NADO operational independence is one of the concepts being considered as part of the 2027 Code update process. During the 2021 Code revision process, there was a consensus among the anti-doping community that this requirement should be further bolstered, which resulted in stronger wording in the 2021 Code.

NADOs have now had an opportunity to implement this requirement, which remains a very relevant topic of discussion by NADOs and other stakeholders. WADA has also had a chance to implement the compliance monitoring process related to this requirement and has identified some challenges/limitations.

In light of the 2027 Code update process, this session will discuss the need or lack thereof to further strengthen the operational independence requirement; whether the Guide for NADO Operational Independence is sufficient; and how to address the issue of National Federation involvement in testing and/or results management that is under the responsibility of NADOs.
